Career Objective

Computer Science undergraduate specializing in Data Science with skills in Python, Java, SQL, Machine Learning, and Data Analytics. Experienced in developing AI-powered applications, predictive systems, and intelligent solutions using modern tools and technologies. Passionate about problem-solving and building scalable AI-driven systems.

Education

Oriental Institute of Science and Technology, Bhopal B.Tech in Computer Science (Data Science)	2023 – 2027 CGPA: 8.84
Queen Mary Hr. Sec. School, Bhopal Class XII (CBSE): 85.8% Class X (CBSE): 91%	2023 2021

Technical Skills

Programming: Java, Python, **SQL**
AI/ML: Machine Learning Basics, Predictive Analytics, Data Preprocessing
Libraries & Tools: OpenCV, Streamlit, **Pandas**, NumPy, **Power BI**
Web Technologies: HTML, CSS, Javascript
Database: MySQL, SQLite
Core Concepts: OOPs, **DBMS**, Operating Systems, Data Structures
Developer Tools: Git, GitHub, VS Code

Projects

AI-Based Dropout Prediction and Counselling System (ML, React.js, Predictive Analytics)	<i>Sep 2025 – Oct 2025</i>
Worked on the Machine Learning and predictive analytics part of this collaborative team project to identify student dropout risk using analytical approaches and student-related data. Contributed to designing a responsive dashboard for counsellors to monitor student performance and provide timely intervention with visualization features.	
AI-Based Crowd Prediction & Smart Queue Management System (Python, ML)	<i>Apr 2026 – May 2026</i>
Developed an AI-powered system to predict crowd levels and manage queue flow at pilgrimage sites using machine learning concepts. Designed a dashboard to display crowd density, estimated wait time, and monitoring insights for improving visitor experience and operational efficiency.	
Air Canvas using Computer Vision (Python, OpenCV)	<i>Nov 2025 – Dec 2025</i>
Built a virtual drawing application using hand gesture recognition and real-time image processing. Implemented OpenCV-based motion tracking for touchless interaction and optimized performance for a smooth user experience.	

Internship

Python Intern – Cybrom Technologies Pvt. Ltd.	<i>Aug 2024 – Sept 2024</i>
Worked on Python programming, debugging, file handling, and mini-project development while improving logical thinking and problem-solving skills through practical coding tasks.	

Certifications

- NPTEL Certification in Python for Data Science(IIT Madras)
- NPTEL Certification in Data Base Management system(IIT Kharagpur)
- LinkedIn Learning Certification in SQL for Data Analysis
- Power BI Essential Training Certification

Achievements & Research Experience

- Presented research paper on **AI-Based Dropout Prediction and Counselling System** at IEEE Code 2K26 Conference.
- Student Star Award for Patent Publication on Predictive Data Science Model using Multi-Modal Clinical Data.
- Served as Assistant Education Minister in the School Cabinet, demonstrating leadership, coordination, and event management skills.
- Solved **250+ coding problems** on CodeChef and other competitive programming platforms.
